If further assistance is needed, see the front cover of this manual. <http://hk-delight.com/UploadFiles/european-ford-focus-2008-manual.xml>

Idle Roller Screws **IMPORTANT** Never apply silicone spray or other substances to the walking belt or the walking platform unless instructed to do so by an authorized service representative. See page 17 to connect a CATV cable to the treadmill or page 18 to connect an AV cable or HDMI cable to the TV. Various factors may key to achieving results. You can use your heart rate as a guide to find the proper intensity level. Note Specifications are subject to change without notice. See The Best Price Now. With the increase in price, NordicTrack gives you a bigger motor and a larger touchscreen display. We like this treadmill. But for the price, you can find models that are really similar for less cost. That being said, this treadmill is built well and is a great home treadmill for any type of user, especially if you aren't concerned with the price. Buying The NordicTrack Commercial 2450 We purchase our treadmills out of pocket, without letting the manufacturers know we're a review site. We aren't getting any special discounts or special treatment. This allows us to get the same experience as our readers, from start to finish. You can even find online coupons that save you a few bucks on your purchase or check their site during holidays for special promotions. The NordicTrack Commercial 2450 Is Built For Users who Run extensively This treadmill is built to handle extensive, daily use. On the flip side, if you're planning on doing very little running and lots of walking, you'd be fine with purchasing a less expensive treadmill. Need help staying motivated during their workout With 50 builtin exercise programs to choose from and free year access to iFit Coach trainers, the 2450 provides plenty of motivation for fitness novices and veterans alike. Want a folding treadmill The Commercial 2450 is a heavyduty treadmill with a powerful frame, yet unlike other sturdy treadmills, this treadmill can also easily fold to free up floor space in your home gym.

NordicTrack Commercial 2450 What We Like Best About The NordicTrack Commercial 2450 The NordicTrack 2450 is a great treadmill. We have very little complaints about it after extensive reviewing and testing, which is why it has earned a high 4.5 star rating. As far as a home treadmill goes, this is a very good one. Highend motor With a 4.0 CHP commercial plus motor, the Commercial 2450 has no problem powering you through backtoback, intense workouts, making it a great option for households where multiple users will be utilizing the treadmill. Packed full of features From the workout programs to the incline range, there are many ways that you can tweak the settings on this treadmill to make it perfect for each workout. Offers an excellent warranty With a lifetime warranty on both the motor and frame, as well as having a 5year parts and electronics warranty, the 2450 is a great deal. Add to that the 2year labor coverage and you have an excellent warranty. Customer Support NordicTrack fitness consultants are available online and over the phone to answer the questions of both users and prospective buyers. Return Policy NordicTrack offers a 30day moneyback guarantee for anyone not satisfied with their purchase. The NordicTrack 2450 is built very well. The assembly requires two people, but is not complicated and comes with detailed instructions. The treadmill is sturdy, and you'll notice very little movement from the console while running even at high speeds. The frame, deck, and motor have lifetime warranties which is a good indication of NordicTrack's confidence in their treadmill's build. Motor Size The 2450 has a 4.0 CHP DurX Commercial Plus motor which is on the higherend of treadmill motor power—we would like to see this in a treadmill. A stronger motor is going to take a better beating. Many treadmills you'd find at your local gym use a commercial model with a 4 HP or CHP motor.

<http://superbia.lgbt/flotaganis/1653061168>

So, if you plan on using the NordicTrack 2450 treadmill daily, for extended periods of time over the years, go right ahead. Running Surface The running surface is what you would expect from a NordicTrack treadmill. It's nice and grippy, stays on the roller, and there are no honking sounds when the belt is running. The size is on the larger side for a treadmill belt at 22" wide and 60" long. NordicTrack Commercial 2450 Running Surface Texture Weight Capacity Users are limited to a max of 300 pounds on this treadmill. If you're close to, or over this weight limit, then a different treadmill would be a better option. Folding The 2450 is a folding treadmill. Really, anyone could raise and lower this treadmill. It doesn't take much strength. The instruction manual recommends that a user must be able to comfortably lift 45 pounds before attempting to fold and move the treadmill around. NordicTrack Commercial 2450 Folded For Space Saving and Transporting. Machines this capable are usually stationary, nonfolding, and heavy. But with one or two people, you can move this treadmill around easily. Noise Level To start our test, we measured the rooms current volume which came to an average of 54.9 dB. Then we measured the noise output from the 2450 at 1 mph, 6 mph, and 12 mph hour with the fans at full blast. You'll see the outcome below. On the plus side, the fans put out a really good amount of wind whereas most other treadmill fans DO NOT. Lastly, the controls on the console all make a beeping sound when pushed. Their noise level reaches approximately 58.7 dB. Max Speed The 2450's max speed is 12 mph. This is the standard max speed for most treadmills. Nothing in this price range will exceed 12 mph. Incline and Speed Controls For The NordicTrack Commercial 2450 Incline With a range of 3% to 15%, the 2450 offers a wider incline range than most of the treadmills in this price range.

<https://datavoiz.com/images/captivate-service-manual.pdf>

Max Incline and Decline For The Commercial 2450 Cushioning The deck can be set to two different cushion settings road and soft. This is done using the handle shown below. The cushioning is slightly more comfortable than the road setting which will benefit anyone in need of extra support. But it really isn't a substantial amount of cushioning. If you need a treadmill with a lot of cushioning, you may want to check out one of the NordicTrack Incline Treadmills. Control Knob For the Commercial 2450 Deck Cushioning Electrical Requirements This treadmill requires a nominal 120volt circuit

capable of carrying 15 or more amps. The instruction manual for the 2450 recommends the use of a surge protector with your treadmill as it can be damaged by surges in electricity. It states “Use only a surge suppressor that is UL 1449 listed as a transient voltage surge suppressor TVSS. The surge suppressor must have a UL suppressed voltage rating of 400 volts or less and a minimum surge dissipation of 450 joules. They’re underselling themselves here. The workouts on this treadmill blow every other treadmill in this category out of the water. They are really engaging, eliminating the boredom that tends to accompany treadmill running and therefore the desire to quit. And all that is before you utilize your free year access to iFit Coach. Should you choose to utilize iFit Coach, you’ll find yourself with countless options when it comes to workout programs, encouragement, motivation, data tracking, and more. NordicTrack treadmills are great all on their own, but iFit Coach integration makes their product unmatched to competitors.

<https://www.jbnature.com/images/captiveworks-700-manual.pdf>

Data Tracking While Workout Is In Progress Data Display For Workout Summary Home Screen iFit Options Home Screen Without iFit Options Workout Library Most Popular Workout Videos Red Rock Series Workout Videos Google Maps Runs Interval Training Incline Training Calorie Burn Targeted Training Speed Training With the free year iFit Coach subscription you receive when you buy the Commercial 2450 through NordicTrack, you can create your own route on Google Maps. As you progress through the run, your treadmill automatically adjusts the incline to match the natural terrain of your route. Display The NordicTrack 2450 comes with a pivoting 14” HD touchscreen. It’s very responsive to your touch, easy to navigate, userfriendly, and bright. The ability to pivot the screen is great because you can eliminate glare when needed or adjust the view for varying heights of different users. It’s also sweatresistant, so feel free to push yourself as hard as you want. NordicTrack Commercial 2450 14” HD Touchscreen Display Speakers There are 2 speakers, each 3” in diameter. They put out more than enough sound that is clear and crisp. Also, you can either choose to plug in your music or sync it via the Bluetooth connection. We recommend using the Bluetooth sync, as the sound quality is slightly better than when plugged in. Volume controls for the

speakers are clearly visible on the console. Fans Hallelujah for NordicTrack's fans. So many treadmill companies include a fan in their machine that is a total waste of production cost. The 2450 has two fans and 4 settings for these fans. They do not pivot, which many other treadmill fans seem to do, but they put out a very efficient gust of wind. If zero pivot equals more power, we'll take it. Powerful Fans Built Into The Commercial 2450 Console This is a big deal because you get hot, sweaty, and pretty uncomfortable as you're working out which can be a big contributor to calling it quits too soon.

You will not have that problem with this treadmill. The fans are a lifesaver when your heart rate is consistently raised, and you're dripping embarrassing amounts of sweat from all parts of your body. The controls for the fans are also easy to spot on the lower part of the console. You can see them in the image below. Heart Rate Monitoring The 2450 has EKG pulse monitors on the handlebar. They're no longer being sold with the chest strap heart rate monitor. The good news though is that most Bluetooth chest strap heart rate monitors will pair with the 2450. Though other treadmills in this price range come with impressive motors, decent warranties, and other similar features, the 2450's entertainment and training components lend to a more engaging workout. NordicTrack Commercial 2450 Subscription Service Name iFit Coach Brief Description View an expansive library of studio treadmill classes, outdoor running, walking, and hiking tours, google maps, and more. Currently, the learning curve is a little uncomfortable. Other iFit has apps that track nutrition, daily activities, and more. Bottom Line Review Of The NordicTrack Commercial 2450 With all things considered, the NordicTrack 2450 is one heck of a treadmill. You cannot go wrong with this purchase. The programs offered, the data tracking, the iFit integration, the reliable build, the stronger motor, and the userfriendly console make for a very good product. There is a good argument for saving a few bucks and going for the Commercial 1750 but your budget will have to decide that for you. To read more reviews of popular treadmills, check out our list of BEST TREADMILLS. NordicTrack Commercial 2450 Best Place To Buy The NordicTrack Commercial 2450 We always recommend buying treadmills directly from the manufacturer. This gives you access to the best prices, better customer service, good financing options, and easier returns if it comes to that.

Like most iFit-enabled treadmills, the new Commercial 2450 has power incline for the track which helps stoke your metabolism and target tone your muscles. What's more, it helps you make the most of iFit Coach virtual outdoor training. As your program shows an uphill path, for example, your treadmill will tilt to match. Additionally the Commercial 2450 has power decline, which is a rare feature in the treadmill industry. Other highlights for the new NordicTrack 2450 include Bluetooth heart rate monitoring capability and Bluetooth audio connectivity to help keep you entertained through your workouts. As for the warranty, the Commercial 2450 comes with 10 years of coverage on the frame, 2 years on parts including motor and electronics and 1 year on labor. In addition, factory direct NordicTrack treadmills also come with 30-day money back guarantees. What We Like Premium Touch screen A premium 14-inch HD touch screen is the centerpiece of the Commercial 2450 console, allowing you to enjoy your iFit workout programs in full view and clarity. 50 Preset Workouts The new Commercial 2450 has 50 onboard workouts, categorized to help you choose programs focused on speed training, interval training, calorie burn, or heart rate. With a home WiFi connection you can enjoy unlimited customized workout routines, from immersive Google Maps trails to interactive HD video workouts designed and led by world-class personal trainers. High-End Motor The 2019 Commercial 2450 treadmill has a 4.0 CHP DurX Commercial Plus motor. This high-quality drive is self-cooling to allow intense training, and it's low-vibration for quiet operation. What's more, it can support a top speed of 12 mph. This allows you to benefit from treadmill incline

training, which can dramatically improve your metabolism and help to target tone your muscles. You can feel the rise and fall of the terrain you are watching, so it really brings your workouts to life.

da-kong.com/userfiles/briggs-and-stratton-quantum-engine-service-manual.pdf

Heart Rate Monitoring The 2450 allows you to track your heart rate with wireless and grip monitoring. A Bluetooth wireless telemetry system with a chest strap can be used although it's not included and must be purchased separately; here, the strap can send a continuous reading to the display, so it's a convenient tool for helping you stay in the optimal training zone. You can even use the monitor with pulse-controlled workouts; these adjust the treadmill's speed and incline to help you maintain a specified heart rate as you train. You can also get a heart rate reading by squeezing sensors on the handlebars. As of 2018, NordicTrack switched the Commercial 2450 from wired audio player connection to having the ability to link up via Bluetooth. When the deck suspension is activated, the jolt of exercise is reduced by about 30%, allowing you to soften impact on your joints. In "road" mode the impact is more like what you experience on asphalt. There's also an integrated tray underneath the console screen to keep your water bottle and phone handy. **Warranty** With only 2 years of warranty on parts and electronics, the warranty on the NordicTrack Commercial 2450 is a bit on the light side compared to its competition. This cardio trainer has always been above average in terms of performance and flash, and the newest version is better than ever, offering Bluetooth audio so you can easily stream your favorite workout playlists as you train. When on sale, the new NordicTrack Commercial 2450 offers top value in terms of performance, electronics and overall quality. The CHP rating is measured in laboratory testing using a dynamometer, which measures the mechanical power of the motor. The CHP rating does not denote the operational horsepower of the treadmill in ordinary household use. In ordinary household use, the motor does not operate at the horsepower shown. Theme ColorMag by ThemeGrill. Powered by WordPress. You consent to our cookies if you continue to use this website. This treadmill has a huge 4.0 continuous horsepower CHP DurX Commercial motor with Smart Response Drive System. This motor powers this NordicTrack treadmill up to speeds of 12 mph, incline up to 14% with "inclinematching tech" and decline up to 3%. The settings can be adjusted quickly with one touch controls. The big 22"x60" running deck utilizes a Runners Flex Cushioning system that can provide a firm, roadlike running surface or a soft surface that is easy on the joints. All of this provides a smooth, quiet running experience. Your knees will thank you later. The 14" interactive touchscreen, HD console is loaded with an incredible 50 programmed workouts and iFit capability it comes with a 1 year membership. Your workout possibilities are endless with these tools. The console also tracks your heart rate while exercising with dual CardioGrip sensors or with the included heart rate chest strap monitor.

The chest strap provides a more accurate, handsfree tracking that will ensure you're in your ideal heart rate zone for burning fat or building endurance. The Commercial 2450 Treadmill is going to last a lifetime and never get old, but with NordicTrack's 30 day moneyback guarantee you can make sure you really do enjoy it. Adjust your speed at the touch of a button. Also allows for up to 3%

decline. Get a new workout every day, automatically track your progress, replicate real life runs with Google Maps, compete with your friends and custom tailor your training to your specific goals. You'll need the included Allen wrench, another adjustable wrench and Phillips screwdriver of your own. Starting with the design features, this treadmill provides speed up to 12 mph, incline up to 15% and decline up to 3%. There aren't a whole lot of treadmills that provide a decline option. The running surface is huge at 22"x60" and comfortable with the patented FlexSelect Cushioning system. This system provides you a soft running surface that is easy on the joints, or you set it to be a more firm surface that simulates road running. It has a tablet holder so you can stay connected while exercising. Most impressive, however, is the large 14" console. The console is loaded with 40 programmed workouts and is iFit compatible. With iFit your exercise options are unlimited. You'll never be bored with a new workout every day. While this will accommodate most users, it might not fit everyone. Other treadmills in this price range provide weight capacities at 325 and 350 lbs. So, if this is an issue with you, there are other choices commercially available. Otherwise, it's a top choice. The Commercial 2450 Treadmill gives you a slightly bigger motor, a 10" monitor, two more programmed workouts and a third accessory fan. Those are the main upgrades from the 1750. Overall, this is an excellent treadmill and will put up with any workout you throw at it.

The delivery crew showed up on time but they had it loaded first in the truck so they had to play tetris to get it out. Then they couldnt get it on the lift gate. It was at this time I noticed that on the box it says machine lift only. These guys had a tiny dolly. They ended up lowering the lift to get it on to the small dolly and that is when then dropped the treadmill box right in the middle of the road. I thought it crush one of the two guys but he made it out of the way.
